

LOS ANGELES COUNTY WIA YOUTH PROGRAM

INFORMATIONAL BULLETIN

NUMBER : YTH 02-14

SUBJECT: IBM Tryscience.org

DATE: 11/13/02

EFFECTIVE DATE: IMMEDIATELY

PAGE 1 OF 1

To: ALL YOUTH SERVICE PROVIDERS

The purpose of this bulletin is to inform youth service providers that IBM has developed a website to drive a youth's interest in science. The website is www.tryscience.org.

Youth across the country and throughout the world have found new adventures at tryscience.org from exploring the Final Frontier, the deep blue sea, or a universe of excitement and discovery.

IBM is dedicating the Month of November as a celebration of this initiative with the hopes of driving the popularity across the world.

At tryscience.org you will find a virtual museum—the first web site to capture the very best science from more than 450 museums around the world. Now, anywhere and anytime, children, parents, and teachers have instant access to experiments, exhibits and scientific breakthroughs.

- Adventure—Interactive experiences
- Experiments—Hands-on scientific activity
- Field Trips—visit science centers throughout the world
- Curious—Investigate scientific topics in the news
- Live cams—Web cameras offering real-time looks into science and technology exhibits

IBM Tryscience kiosks are now appearing at science museums in the United States and abroad, with 50 to be donated to science centers around the world by 2003. Please visit the site and refer it to schools and children's groups whom you feel may find it helpful.

JOSIE MARQUEZ, Director
Employment and Training
