Unemployment data as of 3/3/17 (not seasonally adjusted). Source: CA State EDD Labor Market Information <http://www.labormarketinfo.edd.ca.gov>  
 Population Source: U.S. Census Bureau, 2015 Population Estimate <http://factfinder.census.gov/>. 2010 Census data for CDPs  
**Blue** numbered cities/CDPs are located within L.A. County WDB Local Area

Methodology: Monthly city and CDP labor force data are derived by multiplying current estimates of county employment and unemployment by the employment and unemployment shares (ratios) of each city and CDP at the time of the 2013 Census. Ratios for cities of 25,000 or more persons were developed from special tabulations based on household population only from the Bureau of Labor Statistics. For smaller cities and CDP, ratios were calculated from published census data.

This method assumes that the rates of change in employment and unemployment, since 2013, are exactly the same in each city and CDP as at the county level (i.e., that the shares are still accurate). If this assumption is not true for a specific city or CDP, then the estimates for that area may not represent the current economic conditions. Since this assumption is untested, caution should be employed when using these data.
